

Thermo-Ice | 5132

Features:

Size Range: 5 - 13

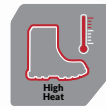

Accreditation: SANS/ISO 20345

Colour: Brown

Heat Resistance: Up to 300° Celsius

Sole: Vulcanised Rubber

Upper: Genuine Leather

COMPONENT SPECIFICATIONS

Upper

- The upper is cut from 1.8 – 2.0mm Split Military Print Leather, which is strong and has high wearing durability.
- This is an entry level vulcanised safety shoe which has a high degree of comfort and durability. Suitable for harsh working conditions.
- The vamp and quarter lining are made from a special furline material which has excellent perspiration absorbency insulation in cold working conditions and a more comfortable shoe for the wearer.

Insole and Insock

- The insock is made from a specially developed antistatic non-woven material, which has exceptional directional stability, durability, comfort and very good insulation properties in cold conditions.
- A special shank reinforcement is moulded into the midsole to give additional support under the arch of the foot.

Vulcanised Rubber

- The rubber sole is heat resistant up to 300° Celsius and provides excellent slip resistance on most surfaces.
- This boot is non-conductive and ideal for situations where there is a high risk of electric shock.

Toe puff

- A thermo coated toe puff that meets SABS requirements.
